BUYING A POOL IN WINTER

So you're thinking of buying a pool? The cooler weather has arrived and swimming is probably the last thing on your mind, but you might be surprised to learn that winter is actually one of the best times to buy and install your new pool. There are many good reasons to get your pool organised now so you'll have it ready for summer, and here's just a few of them:

1. SUMMER READY

Building your swimming pool throughout winter means you're able to enjoy a full swimming season ahead whilst creating a lifetime of memories with your family and friends in your very own pool in your own backyard!

2. AVOID DELAYS

As you are buying outside the peak season rush, you have plenty of time to plan and have your pool installed and ready for when the hot weather arrives. Tradespeople are less in demand in winter compared to the summer months so when summer hits you'll be ready to take advantage of your new backyard addition!

3. TIME TO FIND THE PERFECT POOL

Colours, sizes, shapes, there are so many options to consider but with summer still some time away, you have plenty of time to research and find the perfect pool to create your dream backyard.

4. GET YOUR LANDSCAPING SORTED

Once your pool is installed you need to apply the finishing touches. Your pool will look extra nice with landscaping and outdoor furniture added. Winter provides the perfect conditions for establishing your garden, unlike summer when you'd rather be swimming.

5. THE BEST TIME TO BUY

Winter is a great time to take advantage of off peak prices. Many pool builders are able to offer very competitive pricing for your swimming pool during the cooler months. SPASA members will be happy to provide you with an obligation free quote so get moving now and have your dream backyard ready for the summer ahead!

For the best advice contact SPASA WA Pool Builder members who can help you get started.
